SUMMARY

Computer Science undergraduate entering the final year at HCMOU, seeking a **full-time AI Engineer Internship**. Experienced in end-to-end AI systems across **Generative AI, RAG, Computer Vision, and Vision-Language Models**, from model development and evaluation to backend integration and deployment. Hands-on with Python, PyTorch, FastAPI, Docker, and Linux. **Available full-time for a 6-month internship.**

EDUCATION

Ho Chi Minh City Open University (HCMOU) Sep. 2023 – Sep. 2027 (Expected)
Bachelor of Science in Computer Science; GPA: 3.41/4.00 Ho Chi Minh City, Vietnam

TECHNICAL SKILLS

Programming / Application: Python, SQL, FastAPI, Docker, Git, Linux
AI / Machine Learning: PyTorch, CNNs, RNN/LSTM, Transformers, LLMs, CLIP, LoRA
Generative AI / RAG: LLM APIs, Prompt Engineering, Sentence Transformers, BM25, RRF, Cross-Encoder, ChromaDB, Multi-Agent Workflows
Deployment / Tools: Docker, Linux, Git/GitHub, Logging
Evaluation: Accuracy, Precision, Recall, F1-score, AUROC, AP, Hit@K, MRR

PROJECTS

Multi-Agent Safe-RAG: Legal Contract Intelligence Platform [View Repository](#)
Personal Project May 2026 – Jul. 2026

- Built an **end-to-end Generative AI/RAG system** with dense + BM25 hybrid retrieval, RRF, Parent-Child chunking, Cross-Encoder reranking, and Planner/Critic/Verifier agents, integrated with a **FastAPI backend and Docker-based deployment**.
- Designed and evaluated the prototype on held-out and real-query benchmarks, achieving **81.97% strict child Hit@10** and **0.5214 MRR on 294 held-out CUAD queries**; on a separate **200-query real Google GenAI benchmark**, reached **72.5% strict balanced answerability accuracy** and **80.97% macro citation precision**, with 0/140 wrong-document citations observed.

ACD-CLIP++: Vision-Language Co-Design for Zero-Shot Anomaly Detection [View Repository](#)
Independent Research Project Apr. 2026 – Jul. 2026

- Designed and implemented **ACD-CLIP++ in Python/PyTorch**, covering architecture design, model training, and optimization with Conv-LoRA, attention mechanisms, and multi-scale visual modeling.
- Conducted **literature review, architecture comparison, and cross-domain evaluation** from VisA to six unseen medical datasets, where best observed per-dataset results **averaged 91.19% pixel AUROC and 43.70% AP**, exceeding published ACD-CLIP baselines on CVC-ClinicDB (+0.34/+3.74 points, AUROC/AP) and Kvasir (+0.38/+3.90 points, AUROC/AP).

EfficientNet-Hybrid-FER: Hybrid Architecture for Facial Emotion Recognition [View Repository](#)
Research Project — Co-Researcher Oct. 2025 – Feb. 2026

- Implemented an **EfficientNet-B0 + custom 4-gate LSTM classifier in Python/PyTorch** for facial emotion recognition, using frozen-backbone warm-up, full-network fine-tuning, strong augmentation, and FER-2013 → CK+ transfer learning.
- Improved FER-2013 public-test performance from **64.26% to 67.72% Accuracy (+3.46 percentage points)**, achieving **0.6772 Macro F1** over an EfficientNet-B0 MLP baseline, and reached **94.09% Accuracy on CK+ (+18.68 percentage points)** with FER-2013 transfer initialization.

HONORS & CERTIFICATIONS

Outstanding Student for Academic Excellence – Ranked 1st by GPA in Computer Science, 2026
Faculty of Special Programs (2026) – HCMOU
Academic Merit Scholarship – 5 semesters, including 4 consecutive – HCMOU 2024–2026
Enterprise Integration Training Program – Professional training in workplace readiness and 2026
enterprise integration – HCMOU

LANGUAGES

English: C1 Advanced – EF SET 64/100 (Reading: 76, Listening: 52)
